

# OUTDOOR LIGHTING IS ONLY AS RELIABLE AS ITS CONNECTIONS

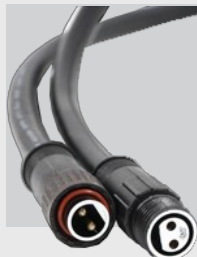

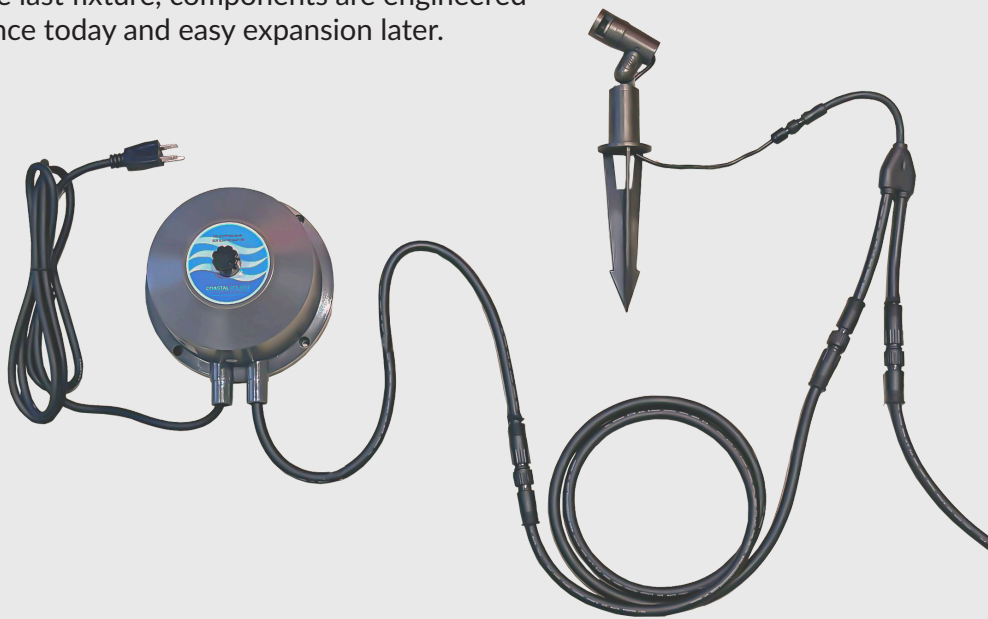

Beautiful outdoor lighting should do more than look impressive on the first night. It should keep performing through rain, irrigation, humidity, soil, and years of outdoor exposure. That is why Boca Tech and Automation specifies Coastal Source for premium outdoor lighting systems. Built to last, built for South Florida.

**Designed as a system.** From transformer to the last fixture, components are engineered to work together, delivering reliable performance today and easy expansion later.

**Typical Weak Points:**

- Field-made splices | Pierced wire jackets
- Moisture entry | Corrosion risk | More service calls

**Connections designed to last.** Patented Coastal Connector / Plug+Play™ cabling uses IP68 waterproof, airtight connectors to help eliminate one of the most common failure points in outdoor lighting systems.

**Lifetime fixture coverage.** All Coastal Source lighting fixtures carry a lifetime warranty. Connectors are covered under Coastal Source's 5-Year warranty program.\*
